DETAILED ACTION

Response to Amendment

Claims 1-2 and 44-47 are pending in this application. Applicant's reply filed February 26, 2007 amended claims 1 and 44 and added claims 45-47.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2 and 44-47 are rejected under 35 U.S.C. 102(e) as being anticipated by Lacheze (U.S. Patent No. 5,956,698).

Referring to claim 1. Lacheze discloses a management system, connected to a communication line, for managing maintenance of a plurality of printing apparatuses, comprising:

- A reception unit that receives a first ID for specifying a first printing apparatus having use history information showing that the first printing apparatus was managed and a second ID for specifying a second printing apparatus as a new apparatus to be managed, the first ID and the second ID being different from

each other and being transmitted via the communication line (Lacheze: abstract, figures 1-2 and 9-10, and column 13, line 63 – column 14, line 11);

- A search unit that searches for first information related to a contract corresponding to the first ID received by said reception unit (Lacheze: figures 5 and 9-10); and
- A generation unit that generates second information related to a contract for the second printing apparatus to be newly managed, based on the first information searched by said search unit (Lacheze: abstract & figures 5,9-10, and column 13, line 63 – column 14, line 11).

Referring to claim 2. Lacheze further discloses a managing system wherein said generation unit further generates display information for displaying the second information generated by said generation unit and further comprising a transmission unit that transmits the generated display information via the communication line (Lacheze: abstract).

Referring to claims 44-47. Claims 44-47 are rejected under the same rationale set forth above. Lacheze discloses a method and computer readable memory medium.

Response to Arguments

Applicant's arguments filed February 26, 2007 have been fully considered but they are not persuasive. Applicant amended the claims to more clearly recite the management of multiple printing apparatuses with distinct IDs. As noted in the cited passages of Lacheze above, Lacheze clearly discloses the management of multiple

printing apparatus including updating the system with new apparatuses (see specifically figures 9-10 showing multiple apparatus with distinct IDs). Furthermore, column 1, lines 41-58 of Lacheze disclose that it is old and well known in the art to "create a new account and specify a subset of system functions, from a set of system functions, to be used in the new account (Bennett: 5,146,344)." The new account is therefore based on previously defined system functions for that customer's current billing meters.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

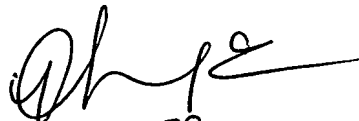

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
